

Module Code & Module Title - CT5052NP (Network Operating System)

Level 5 – Network Operating system

Assessment Type

Logbook - Report

Semester - 2023/24 Autumn

Student Name: Dipshan Ranabhat

London Met ID: 23048797

Assignment Due Date: 4 January 2025

Assignment Submission Date: 4 January 2025

Submitted To: Prashant Adhikari

Word Count : 576

I confirm that I understand my coursework needs to be submitted online via Google Classroom under the relevant module page before the deadline in order for my assignment to be accepted and marked. I am fully aware that late submissions will be treated as non-submission and a mark of zero will be awarded.

1. Introduction

Active Directory is a directory service that provides centralized management of resources that is used for managing permissions and access within an organization developed by Microsoft for Windows domain networks.

2. Objective

The Objective of this workshop is to install Active Directory in our windows server 2022.

3. Tools and Software Used

- i. Virtual Box
Virtual box is a free cross-platform virtualization tool which helps to run multiple operating systems on single device. It is mostly used by developers to efficiently test and deploy applications .
- ii. Windows Server 2022
It Network OS for managing network resources, to store data and support network infrastructure. It has a role in web hosting and managing small to big enterprise level services.

4. Steps

Figure 19: Forest details of Active Directory

5. Conclusion

In conclusion, in this workshop we installed Active Directory on our windows server 2022 and verified the installation of Domain controller using terminal.
